Installing Contractor:

N/A

Installation Type:

Hot water heating and
cold water cooling with
ventilation

Application:

Buildstore has chosen The Unico System to be installed in its new National Self-Build and Renovation Centre; this centre's purpose is to advise customers what options are available to them when starting remodeling projects. The Unico System will be used to completely heat and cool the complex.

Equipment:

2 x 4860 chilled water and hot water heating air handlers, which are linked to two Unichiller reverse cycle chillers.
